

ENTERPRISE MOBILITY - EDUCATION

Mobility is becoming a salient element in the next generation of eLearning. Mobile devices are turning to be highly instrumental in the lives of students, teachers, schools and universities. There is an evolving need to glue the components of the new learning reality into a manageable environment for an effective ecosystem. COMMUNITAKE is helping to streamline the new learning space with easy and intuitive system that facilitates manageability, reliability and supportability.

CAPABILITIES

DEVICE MANAGEMENT

COMMUNITAKE views, tracks and manages all your institution devices, the device attributes, the device branded display, the device users and the device connectivity to your institutional network and content. Define device settings over the air and enforce the compliance to your policies.

APPLICATIONS MANAGEMENT

COMMUNITAKE defines prohibited on-device applications, mandatory on-device applications and the faculty application catalog. Define prohibited applications via blacklisting or allowed only applications for kiosk mode. Perform dynamic mass distribution of new and updated education applications and track and monitor compliance to the institution's application policies.

BROWSER CONTROL

COMMUNITAKE controls browser use to ensure that students navigate to only acceptable websites. Blacklist restricted websites or whitelist websites. Define allowed only websites, prohibiting the access to all other non-whitelist websites.

PRODUCTIVITY MANAGEMENT

COMMUNITAKE supports all models of device ownership. Differentiate the use of applications, web browsing and mobile services, based on the device time and location. Protect users' privacy by limiting the data collection from privately owned devices.

COLLABORATION

COMMUNITAKE enables device sharing between the members of the institution's communities. A community member can invite another member to assume control over the requesting device for remote guidance and consultation.

LEARNING CONTENT DISTRIBUTION

COMMUNITAKE runs mass distribution of educational content to groups of students. Activate an easy publication mechanism of files, documents and applications with no complex campaigns. Ensure the presence of learning material in the devices.

SAFE DIALOG

COMMUNITAKE allows safe dialog between faculty members inside a secure container. Messages are visible only to properly managed devices. When a device is unenrolled, all messages are deleted.

CONNECTION MANAGEMENT

COMMUNITAKE provides device holders with an on-device application that seamlessly tests the device and performs auto repair actions to optimize the device use everywhere and anytime.

REMOTE SUPPORT & GUIDANCE

COMMUNITAKE enables IT staff to remotely control a device and provide effective support and guidance to the faculty staff as if they are holding the device in their hands, regardless of its actual location.

VALUE

1

SMART AFFORDABLE AND EASY TO SETUP SYSTEM

- ▼ Simplifies management via an intuitive GUI requiring minimal IT knowledge
- ▼ Eases mobility management via one-and-done policies and mass distribution
- ▼ Delivers best value, best priced education mobility solution

2

SEAMLESS REGULATED LEARNING

- ▼ Locks down devices generating higher focus on learning tasks
- ▼ Provides on-device diagnostics and auto repair app for always connected users
- ▼ Integrates device takeover for remote guidance and collaboration

3

HIGHLY SECURE COMMUNICATION AND CONTENT

- ▼ Secures access to institutions' content and email
- ▼ Maintains sensitive messaging inside a contained environment
- ▼ Prevents security violations via automated compliance

TECHNOLOGY

- ▼ COMMUNITAKE supports Android (2.3+), iOS (5.0+), WP (8.1+) (Note: features vary by the operating system)
- ▼ Cloud based solution or on-premises deployment along with White-label branding
- ▼ Multi-tenant, highly scalable and redundant architecture

COMMUNITAKE delivers a comprehensive Mobility platform that unifies robust multi-channel support with highly secure device, smart Enterprise Mobility Management, and core Android Internet of Things. The CommuniTake solutions suite (1) turns support to be the hallmark of a successful service provider; (2) manages mobile resources, processes and security to effectively operate business mobility; (3) enables complete wiretapping protection for mobile devices; (4) and facilitates seamless performance for connected Android machines. CommuniTake proven success features superior technology; advanced functionality; flexible delivery methods; and white label models. CommuniTake products are deployed by foremost operators and businesses worldwide.
